

Pathlock

AUTOMATIC INTERNAL LOCATION & LOCKING OPERATIONS

Pathlock is the system developed by das-Nano that allows the user to control in real time the internal location of all the factory tooling and trolleys used in production. The system includes a set of locks, remote controllers, beacons, sniffers and servers that all together enable the automatic control of locking/unlocking operations of pallet/trolleys/carts, having full traceability of all this operations.

HARDWARE

The hardware and software is proprietary of das-Nano.

LOCATION

Internal Location, 4 Eye Principle

REAL-TIME

No RFID, No GPS, Real-time.

SECURITY

Locking/Unlocking Control, High Security Locks

PERFECTION IS A MATTER OF ACCURACY
