

vali-Das

DOCUMENT & PERSON BIOMETRY IN THE CLOUD

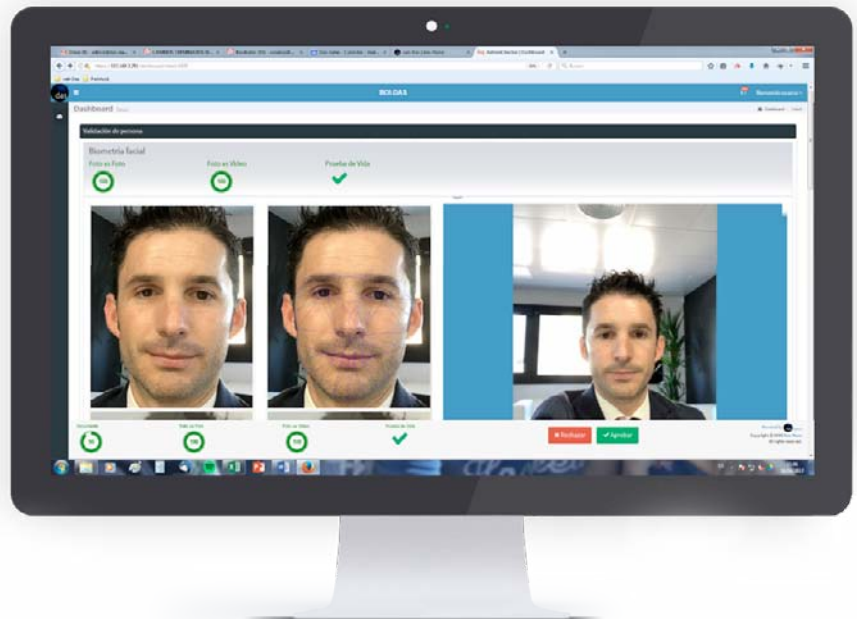

Vali-Das is the software authentication suite used by top Banks in the world for non-assisted remote authentication and on-boarding that integrates different APIs for:

- ✓ Document authentication.
- ✓ Customer Identification: Face biometry, Voice biometry and Liveness proof.
- ✓ Automatic data extraction by advanced OCR.
- ✓ Database and Back-Office system for total control

OWN TECHNOLOGY

The whole system is integrated into Docker services and can be supplied as SaaS in a commercial or private cloud environment. das-Nano can supply any API, to be deployed and integrated into any service. Ask us about the different integration possibilities.
